Subject: I Support Michigan Street Bike Lanes!

I represent many business owners, and property owners throughout downtown Duluth. We want all forms of transportation access to be available to drive commerce and prosperity in the area, however it is cars per day that are the absolute life of these stakeholders, not bikes. We want them to have access, but in an appropriate way.

Personally, I feel there shouldn't be bike lanes on Michigan Street either. All the bikers have excellent access into downtown by either the same obvious method of using the streets coming down hill, or by accessing the area via the already built Lakewalk. There is absolutely no reason to lose one single parking stall because of the overblown silliness of bike access to downtown, as it already exists.

Sincere Regards,
Greg Follmer
