

Exhibit A

City of Duluth

Street Improvement Program

Transportation Sales Tax Plan

2019

PROJECT SELECTION CRITERIA

The City of Duluth is responsible for approximately 452 miles of roadway, broken down into arterials, collectors, and local residential streets. Because all of the projects listed in the attached Road Projects list is an integral part of the current and future transportation system serving the region encompassing northeastern Minnesota and western Wisconsin and is therefore critical to the welfare and viability of the entire region, each of these project is of regional significance and should receive priority in the use of the subject funds. The City is also responsible for the maintenance and repair of 85 roadway bridges, as well as sidewalks and retaining walls along the city streets.

In 1994, the City of Duluth initiated a Street Reconstruction Program (SIP). The intent was to reconstruct all the streets within the City over the course of 50 years. This program was suspended in 2009 due to loss of funding. As a result, very few streets have been reconstructed over the last ten years.

A reliable funding source is now in place, with the funding dedicated to the maintenance, preservation, and reconstruction of city streets, bridges, sidewalks, signals and lighting, and retaining walls. A five-year Capital Improvement Plan is compiled each year as part of the budget process.

The street inventory and associated costs have been developed and assigned to individual sections based on the roadway type, condition and improvement strategy. This allows the city to provide the appropriate repair at the appropriate time to maximize our investment.

Projects will be selected based on the below criteria:

Project consideration criteria

- Age and condition of street based on pavement management ratings (ICON system)
- Type of street usage
- Volume of traffic
- Maintenance costs of existing streets and icing problems
- Relationship to other construction or projects:
 - o Redevelopment and urban renewal
 - o Geographic distribution around the city to fairly and equitably improve neighborhoods
 - o Coordination with utility projects
 - o Bridges
 - o Continuity with other projects
 - o Start neighborhood projects at the bottom of the hill, and work our way up. Storm sewers need to be sized appropriately.
 - o City responsibility for work adjacent to or part of Federal, MNDOT, County or grant funded projects
- Multimodal projects, bus and bike routes
- Other public safety and welfare considerations
- Bridge repair and construction based on bridge inspection data as well as hydraulic determinations.
- Sidewalk projects to comply with the City of Duluth's ADA transition plan for public right of ways

- Retaining wall repair or replacement based on structural analysis to support roadways and sidewalks

The following attachments detail the projects and estimated reconstruction costs, with all costs shown in 2019 dollars:

Summary of Street Improvement Program Projects
