Agent		Contact		
Legal Description	See Attached	Sign Notice Date	August 27, 2024	
Site Visit Date	August 20, 2024	Number of Letters Sent	30	

Proposal

The applicant is seeking a variance from the front yard accessory structure setbacks to construct a 197 square foot shed in the corner front yard area between the existing home and the garage.

Staff Recommendation

Staff recommends that the Planning Commission approve the variance.

	Current Zoning	Existing Land Use	Future Land Use Map Designation
Subject	R-2	Residential	Traditional Neighborhood
North	R-2	Undeveloped	Traditional Neighborhood
South	R-2	Undeveloped	Traditional Neighborhood
East	R-2	Residential	Traditional Neighborhood
West	R-2	Undeveloped	Traditional Neighborhood

Summary of Code Requirements

Sec. 50-37.9.C – General Variance Criteria (paraphrased): Granting of variances of any kind is limited to situations where, due to characteristics of the applicant’s property, enforcement of the ordinance would cause the landowner exceptional practical difficulties or undue hardship. The Planning Commission must find the following for a variance to be granted: a) That the landowner is proposing to use the property in a reasonable manner, b) that the need for relief from the normal regulations is due to circumstances unique to the property and not caused by the landowner, c) that granting the variance will not alter the essential character of the area, d) that granting the variance is consistent with the intent of the UDC and the Comprehensive Plan.

Comprehensive Plan Governing Principle and/or Policies and Current History (if applicable):

Governing Principle #5: Promote reinvestment in neighborhoods: this project allows a homeowner to make property improvements to increase value in their home.

Housing Policy #4: – Improve the quality of the city’s housing stock and neighborhoods

Future Land Use

Traditional Neighborhood: Characterized by grid or connected street pattern, houses oriented with shorter dimension to the street and detached garages, some with alleys. Limited commercial, schools, churches, and home businesses. Parks and open space areas are scattered through or adjacent to the neighborhood.

History

The house is 1,096 square foot single story constructed in 1914. The property currently functions as a single-family residence.

Review and Discussion Items:

Staff finds that:

- 1) The applicant is seeking variance from 50-21.3 to construct a 197 square foot accessory structure between the façade of the existing home and the street.
- 2) Section 50-21.3 prohibits accessory structures between a street and any façade of a primary building facing that street.
- 3) There is a concrete pad present that the applicant had planned to use for construction of garage. The applicant indicated that after understanding the zoning regulations, including criteria for a variance, and evaluating potential garage locations within the buildable area, the project has been scaled down to the proposed shed.
- 4) *Variance Criteria #1 (exceptional narrowness, shallowness, or shape):* The property has significant steep grade going up the rear of the property from the back of the home. The front yard areas nearest the street present the flattest areas for building.
- 5) *Variance Criteria #2 (circumstances unique to the property, not created by the property owner):* The subject property is similar to other properties in Observation Hill including the size of the lot and the position of the home. The uniqueness of this property is with the steep rear yard combined with the corner yard that restricts building.
- 6) *Variance Criteria #3 (circumstances are peculiar to this property and do not apply generally to other land or buildings):* The combination of a steep rear yard and corner setback create a unique circumstance for building conforming structures on the property.
- 7) *Variance Criteria #4 (proposes to use in a reasonable manner not permitted by code):* Applicant’s proposal for a garden shed is a reasonable use for a residential property.
- 8) *Variance Criteria #5 (not impair light/air, increase congestion, or impair public safety or property values):* The variance will not impair an adequate supply of light and air to adjacent properties as the area is a relatively dense neighborhood and the shed is small in scale. The proposed use will not unreasonably increase the congestion in public streets or unreasonably diminish or impair established property values within the surrounding areas.
- 9) *Variance Criteria #6 (will not impair intent of this Chapter or alter the essential character of the locality):* A garden shed is a common structure found on residential properties and would not alter the essential character.
- 10) Variance criteria #7-9 do not apply to this application.
- 11) No public, agency, or City comments were received.
- 12) Per UDC Section 50-37.1.N, approved variances lapse if the project or activity authorized by the permit or variance is not begun within one-year.

Staff Recommendation

Staff recommends Planning Commission approve the variance with the following conditions:

- 1) The project be constructed according to the site plan submitted with this application.
- 2) Any alterations to the approved plans that do not alter major elements of the plan may be approved by the Land Use Supervisor without further Planning Commission action; however, no such administration approval shall constitute a variance from the provisions of Chapter 50.
