To: Council <Council@duluthmn.gov>
Subject: Polymet

I am writing to ask that the council take action, issuing a request that a judge review the public input and the Polymet application prior to the DNR issuing any permits.

The St Louis River is an integral part of our community, in which we have invested millions and millions of dollars. Our lake is our life blood.

This needs full disclosure, full transparency. If the science Polymet puts forth is solid, it will withstand any public examination.
