CITY CLERK OFFICE

Duluth City Council
c/o Mr. Jeffrey Cox, Clerk
Duluth City Hall
411 West First Street, Room 330
Duluth, Minnesota 55802

Dear Council Members:

Subject: Quarterly Report, TOC/Alkalinity Monitoring for the Control of Disinfection Byproduct (DBP) Precursors, Duluth, St. Louis County, PWSID 1690011

Your water system has been collecting total organic carbon (TOC) and alkalinity samples to determine compliance with the precursor removal requirement of the Stage 1 Disinfectant/Disinfection Byproduct (D/DBPs) Rule. The Stage 1 D/DBPs Rule requires surface water systems that use conventional filtration treatment to achieve specified TOC removal levels or meet one of the alternative compliance criteria specified in the rule.

The attached table contains your TOC and alkalinity results for the last four quarters. The C/E value on the last column of the report is a ratio of the achieved and the required TOC removal. An average C/E value of 1.0 or greater, i.e., $C/E \geq 1.0$, indicates that the TOC removal requirement has been met.

Your water system must submit TOC/alkalinity samples as required by rule. Failure to submit these samples will result in a monitoring violation, to be determined quarterly. Compliance for TOC removal will be determined quarterly, based on the running average of the most recent 12 months monitoring results.

If you have any questions regarding the monitoring, results, or the alternative compliance criteria, please contact me at 651/201-4660.

Sincerely,

A handwritten signature in black ink that reads "De Rindal".

Michael Luhrsen, District Engineer

Duluth (1690011) – 2018 Quarter 4, TOC/Alkalinity Monitoring Results

*System meets alternative compliance criteria for TOC removal with raw & treated water TOC < 2.0 mg/L

DBP precursor removal required for surface water systems and GWUDI of surface water systems using conventional treatment:

Source Water TOC mg/L	Source Water Alkalinity mg/L as CaCO ₃		
	0-60	>60-120	>120
>2.0 - 4.0	35.0%	25.0%	15.0%
>4.0 - 8.0	45.0%	35.0%	25.0%
>8.0	50.0%	40.0%	30.0%
