RESOLUTION AUTHORIZING A SUBSCRIBER AGREEMENT WITH ST. LOUIS COUNTY, MINNESOTA FOR THE USE OF CERTAIN ONLINE SOFTWARE TO ACCESS ELECTRONIC DATABASES OF REAL PROPERTY RECORDS AT THE COST OF \$80 PER LICENSE.

CITY PROPOSAL:

RESOLVED, that the proper city officials are hereby authorized to execute a subscriber agreement, substantially the same as the agreement attached as Exhibit 1, with St. Louis County, Minnesota (the "County"), for the use of certain online software to access electronic databases of real property records at the cost of \$80 per license unless otherwise modified by the County in writing or published on the County's website.

STATEMENT OF PURPOSE: This resolution authorizes an execute a subscriber agreement, with St. Louis County, Minnesota (the "County") for the use of certain online software to access electronic databases of real property records at the cost of \$80 per license unless otherwise modified by the County in writing or published on the County's website.

The County records documents pertaining to real estate within the County. Once documents are recorded, the County maintains a searchable index and database of the documents, which can be accessed electronically through certain online software. This agreement allows for use of the online software to access the County's electronic real estate database.

Each employee within the city that previously accessed the online database did so without cost or agreement and through one account that was shared across departments. The County has recently begun charging all municipalities and townships within the County for continued use of the online database, and this agreement formalizes the terms and conditions under which the city can access the online database.

Each department that desires access will need its own license and will be responsible for pay for the cost of said license. However, due to the city's provision of GIS services to support certain County functions and programs, the County will provide one license at no charge. At the time of this resolution, it is anticipated that the city will need three additional (paid) licenses. The city may increase or decrease the number of licenses throughout the term of the agreement.

The agreement shall continue to remain in force until terminated by either party.
