ComfortSystems intends to work with multiple vendors over the course of the next year to test various technologies for use during the assessment process. In order to accommodate this testing, purchasing issued a Request for Proposals on December 8, 2016 with the goal of qualifying multiple firms.

Three proposals were received by the due date. The proposals were evaluated by a team of City staff; and all three firms were deemed qualified. Northern Energetics received the highest total score when both technical and cost evaluations were completed and is recommended for award of the primary contract. Northern Energetics also held the previous contract to provide energy assessment services for the Home Energy Assessment Program.
